

SwissPIR

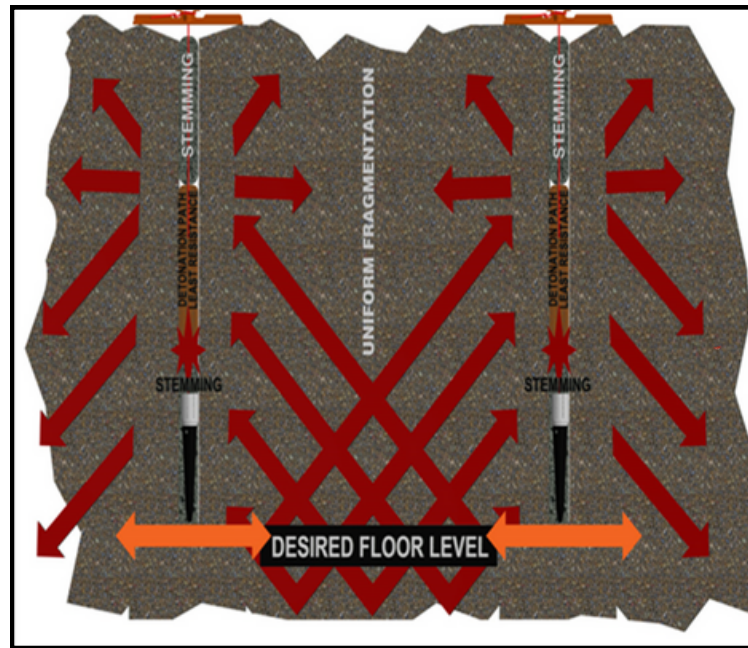

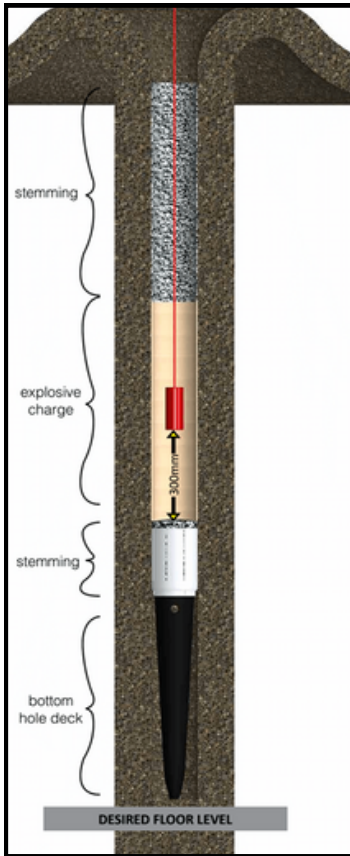

SuperCone

The SwissPIR SuperCone is more than a decking device - it's a performance multiplier. By unlocking the full potential of your explosives through precision air decking, it cuts costs, boosts fragmentation, and reduces vibration all while advancing your Environmental Social and Governance goals. Choose SuperCone where innovation meets impact, and every blast delivers maximum value with minimum waste.

Value Points:

- ✓ Save More
- ✓ Blast Smarter
- ✓ Perform Better
- ✓ Capex reduction
- ✓ Opex reduction
- ✓ Benefits Local Community

- ✓ Primary loading pressure still very high, but total time after initiation is markedly longer.
- ✓ Energy retention & distribution significantly enhanced. and more efficient
- ✓ The above application results in less fly rock, less vibration, optimised fragmentation, wall stability, improved floor conditions and possible reduction in sub drill.

About SwissPIR

SwissPIR's chemical and operational solutions redefine mining performance across Africa. Through Vivo Energy, SwissPIR brings world-class innovation directly to mine sites to unlock safer operations, greater efficiencies, and higher-yields.
